Art Unit: 1625

It is clear from the limitation of the anion of the iodonium salts when only 1 of R26 and R27 is a moiety of formulae 2 or 3 that there is art on the iodonium salts that doesn't apply to the sulfonium salts which have no such proviso. See Polish J. Chem. 71, p. 1236-1245 (1997) where 2-(phenyliodonio)xanthene-9-one tetrafluoroborate is disclosed. Therefore the presumption of a single inventive concept is destroyed.

Restriction is as follows:

I. Claims 1,2,4-13, 24-26,30, 31,34 and 35 drawn to heterocycle- containing sulfonium salts and methods of polymerization using them as initiators, classified in Class 549, sub-class 289 e.g.

II. Claims 1,3,14-23,27-29,32,33,36 and 37 drawn to heterocycle-containing iodonium salts and methods of polymerization using them as initiators, classified in Class 549, sub-class 23 e.g.

Further in case no generic claim is found to be allowable election of a single disclosed species is required.

Thus for the above reasons and because of the different structure,i.e. no similar structural core, and the different classification restriction is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
